Classification_Project

Proposal For Classification_Project

Background:

• Tawakkalna is a Saudi application to serve citizens and residents by knowing official documents and performing some government services.

• The value of the project for the Tawakkalna application is to know the customers impression through the comments available for the application in the Apple Store and Google Play Store to develop application services.

Data Description:

• From library google_play_scraper and app_store_scraper, I extracted data comments from Tawakkalna app in Apple Store and Google Play Store.

• A dataset was used in this project for a period of more than 1 year from APR 2020 to SEP 2021.

• I used two dataset one from Apple store and another from Google Play Store

For Google Play Store it contains 10 columns and 37179 rows
For Apple Store it contains 7 columns and 3112 rows

Tools:

Technologies: python, Jupyter notebook.
Libraries: Numpy, Pandas, Matplotlib, Seaborn, Regex, Sklearn, google_play_scraper, app_store_scraper, googletrans
